

Sanjeevei A

Kumbakonam, Tamil Nadu, India

 /A-Sanjeevei  /Sanjeevei-A

Email : asanjeevei@gmail.com

Mobile : +91-9385951728

EDUCATION

- **Higher Secondary Certificate** Myiladuthurai, Tamil Nadu
Silver Jubilee Mat Hr Sec School; Score: 78.67% 2021-2022
- **B.E. Computer Science and Engineering** Chennai, Tamil Nadu
Sairam Engineering College; CGPA: 6.94 2022 – 2026

SKILLS

- **Languages:** Python, Java, SQL, HTML, CSS, JavaScript
- **Databases:** MySQL, MongoDB, PostgreSQL
- **Technologies:** TensorFlow, Keras
- **Others:** Linux, Git, Visual Studio Code, Open Cv

INTERNSHIP

Futurecalls Technology Private Ltd – Developer Intern |

June 2025 – July 2025

A E-Commerce Website:

- Collaborated with the development team to design and implement web-based solutions for client requirements.
- Developed and tested modules using html, CSS and Php and MySQL, improving system efficiency and maintainability.
- Participated in code reviews, debugging, and optimization to ensure high-quality deliverables.
- Integrated APIs and enhanced UI responsiveness, resulting in 20% faster page load times.
- Documented technical workflows and prepared user guides for deployment and maintenance.

PROJECTS

- **Insight-X: A EDA Project**  /Insight-X
Python-Pandas, NumPy, Matplotlib, Seaborn Jan 2026
 - Performed **EDA on a real-world dataset** to identify trends, correlations, and anomalies.
 - Cleaned and preprocessed data by handling **missing values and outliers**.
 - Created **visualizations and statistical summaries** to derive actionable insights for data-driven decisions.
- **PredictIQ: Machine Learning Project using Scikit-Learn**  /PredictIQ-ML
Python – Scikit-Learn, Pandas, NumPy, Matplotlib Mar 2024
 - Built and evaluated **machine learning models** using Scikit-Learn to solve a supervised learning problem.
 - Performed **data preprocessing, feature scaling, and train-test splitting** for model readiness.
 - Assessed model performance using **accuracy, precision, recall, and confusion matrix**.
- **AnimalVision**  /AnimalVision
Python, TensorFlow, Keras, OpenCV, Flask Sep 2025
 - Developed an **AI-based image classification system** to identify and categorize animals from uploaded images.
 - Collected and preprocessed datasets using **OpenCV** for noise removal and image normalization from kaggle.
 - Trained a **Convolutional Neural Network (CNN)** achieving **94% accuracy** in animal species detection.
 - Deployed the trained model through a **Flask web interface**, enabling real-time animal identification.

CERTIFICATIONS

- **Languages:** NPTEL Introduction to C Programming, Hackerrank python basics, Udemy MERN Bootcamp
- **Mern Stack:** UDEMY
- **Other Technologies:** UiPath RPA Developer , NPTEL Cloud Computing , NPTEL Introduction to IOT

ACHIEVEMENTS

- **NPTEL:** Secured Elite Silver in Introduction to IOT, secured elite in cloud computing
- **GeeksForGeeks:** Scored A Decent among college campus, in coding contests
